NEW! Mount backup images (with the Archive List)

Paragon Drive Backup is designed to completely backup your system and data, providing you with the most efficient methods for data protection.

With the new version we have pioneered the way for supporting the new Windows Vista operating system.

	Benefits	Pers.	Prof.
Paragon HotBackup™ Technology	Fast and reliable hard disk imaging without interrupting the running processes.	✓	✓
Microsoft VSS-Technology Integration	Microsoft VSS technology enables an online backup of a working PC to be made (without leaving Windows).	✓	✓
Bootable Backup Capsule	Boot the computer into the recovery environment (PTS DOS) directly from a Backup Capsule (a Recovery CD-ROM is not required) and perform any restore operations if the operating system is corrupted or if there are problems booting the computer.	✓	✓
Archive Database	The Archive Database is designed to manage all of the backup archives within a single database independently from the location of the backup files.	✓	✓
Mount Images (with the Archive List)	Simply browse, use, or extract files from backup archives using Windows Explorer or any other Windows application.	✓	✓
Restore with Shrink	The Restore with Shrink function enables a backup image to be restored to a free block of smaller size by taking into account the amount of actual data in the image only.	✓	✓
Shutdown after scheduled backup	The Shutdown function enables the computer to be automatically switched off after the successful completion of any scheduled operation.	✓	✓
Long Comments	Long comments can be entered which describe the backup archives.	✓	✓
DVD+/-R (DL) Support	Backup archives can be burnt to DVD+/-R DL (Dual Layer) disks	✓	✓
Updated Recovery CD	Supports a wide range of hardware, including a newly installed system.	✓	✓
Vista compatible	Windows Vista compatibility results in complete backup/restore functions: including Hot Backup™ and Image Mounting under Microsoft Windows Vista.	✓	✓
Simple Dynamic Disk support	View dynamic volumes.	✓	✓
Full Dynamic Disk support	View, convert, backup, and restore dynamic volumes.		✓
Dynamic Volumes Backup/Restore with Hot Backup™	Backup dynamic disks online.		✓
Restore Dynamic Disks with Autoresize	Dynamic disks can be automatically resized during restoration to fit the optimal volume.		✓
Cyclic Backup-Wizard	Automatically and periodically backup data in basic or differential mode. The latest backup will always be saved.		✓
File Transfer Wizard	Copy files easily and quickly, similar to using Windows Explorer.		✓

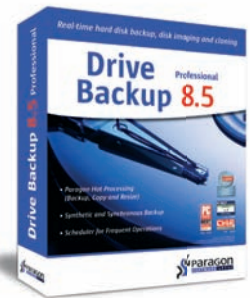

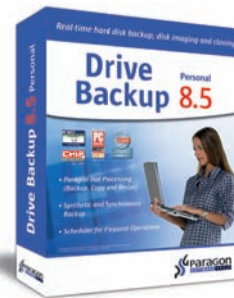

User-friendly Interface

The Personal Edition is designed for PC or notebook users who want to be prepared against any unpredictable damage of their file system. It contains a range of useful NEW features, such as Archive View, Bootable Backup Capsule, regular and scheduled backups; all of which work with the new Windows Vista system now.

The Professional Edition provides you with a range of advanced features, including support for your home network and also full support for dynamic volumes. The NEW functions can be used for example to create scheduled backups using the Task List, and to backup or restore backup images to and from a shared network folder.

Select the edition which suits your requirements:

Personal Edition:

49,95 \$
